In the above referenced paper, we obtained a new lacunary sequence $\theta' = (P_{k_r})$ using a sequence of positive real numbers (p_k). But we did not notice a lack of provision in the article. Throughout the paper, $H_r \to \infty$ as $r \to \infty$ should be assumed. The reason for adding such a provision is that the assumption "$P_n \to \infty$ as $n \to \infty$" may not be enough to obtain the condition "$H_r \to \infty$ as $r \to \infty$".

Also, in the hypothesis of Theorem 6, the condition $I_r' \subset I_r$ should be added, whereas the condition $I_r \subset I_r'$ should be added in the hypothesis of Theorem 7 and Corollary 3.
